So when it's time to make a choice, make the logical one ... Altair!

being your single source in our specialty disciplines: Insulation, Metal Building Siding and Roofing, Refractory Applications, Asbestos and Lead Abatement, Fire Protection, Hazardous Waste Remediation, Noise Control and Specialized Fabrication. Acting as a prime contractor or a subcontractor, Altair provides new construction and maintenance services.

Mechanical Insulation

Metal Buildings

Asbestos/Lead Abatement

Scaffolding

Fire Stopping

Maintenance

Noise Control

Certified Energy Assessments

For the industrial construction market, Altair provides expertise in thermal and acoustical insulation, specialized fabrication and sheet metal lagging of piping, ductwork, equipment and vessels.

Altair provides insulation for process and condensation control, energy/heat conservation, and personnel protection in commercial and industrial applications such as piping/ductwork/breachings, tanks and vessels, boilers, precipitators and baghouses.

Examples of Altair insulation and lagging fabrication can be found in removable valve/pump covers and removable blankets for turbines and equipment. We're also a supplier of insulation and lagging materials.

Altair installs and repairs refractory materials for most applications in boilers, furnaces and petrochemical vessels.

For commercial and industrial customers, Altair provides asbestos and lead abatement services on renovation and modification projects. Our consistent and superior execution enables us to continually meet critical project schedules.

Altair supplies and installs siding, roofing and soffit systems for metal buildings and building modules, including accessories such as man-doors, windows and HVAC components. Architectural installations include conventional "sandwich wall" applications, self-framed structural panel systems and single component foam panel systems.

Altair can also provide passive fire protection products and services such as fire proofing penetrations, intumescent cable tray systems and air & grease duct fire rated systems.
